Break Up with Excess Sodium

RESOURCE LIST

Call to Action:

Reducing the amount of sodium in your diet can help you lower or avoid high blood pressure, which reduces your risk for heart disease and stroke. Make a pledge to reduce the sodium you and your loved ones consume and invite others in your social networks to join you in pledging to reduce their sodium intake. Visit heart.org/sodium to learn more.

This lesson provides suggested American Heart Association/American Stroke Association resources. You can tailor the lesson to your specific community needs. Add more resources or substitute different ones to make the lesson work best for your community.

Is the program aimed at adults?

Yes. Keep participants interested by breaking them into small groups to review a resource. Ask each group to share what they learned with the full group.

No audiovisual equipment?

No worries. Make copies of printed handouts. Ask participants to take turns reading key messages aloud.

Have a projector?

Great. Use the slides to guide your talk. And download an American Heart Association video for one of your interactive activities.

Have a good Internet connection?

Show one of the American Heart Association videos, break participants into groups to take an online quiz or give a demo of an online tool.

Think about which formats best teach the health messages to your community members.

Consider what type of information is most motivating for your community.

BREAK UP WITH EXCESS SODIUM | RESOURCE LIST

The icon in front of each resource tells you the format of that activity. Below are tips on how to incorporate that activity into the lesson and how much time to budget for it.

Video: Play the video and engage participants in a discussion after the viewing.

Printed Handout: Ask volunteers to take turns reading the information on the handout.

Group Discussion: Break participants into small groups. Ask each group to review the resource and report what they learned to the full group.

Online Tool: Give a short demonstration of the tool. Encourage participants to make a note of the URL so they can access it from home.

Additional Sodium Resources

Sodium

Get the facts about sodium, how it affects your health and discover ways to reduce the sodium in your diet.
